02:14:00 pm □Headache-Free Payroll Service For Small Businesses 

Small business owners are often frustrated with the hassles associated with payroll, most frequently the time it takes away from their core business. Large payroll firms are frequently not the answer for small businesses, as they can be prohibitively expensive and impersonal.

Now, there's a new payroll product from Bookkeeping Management Administration, a leader in the field of outsourced bookkeeping services, that is accurate, dependable, cost-effective and designed for small to mid-sized businesses. Companies are charged one flat fee for all of their employee needs, so there are no hidden fees or minimums—a company can add or deduct individuals at will with no additional charge. The service is also designed to interface with QuickBooks®, turning your payroll headache into an easy-to-manage, up-to-the-minute solution.

“Our payroll service is customized for each customer and their business. When time is figured in, it can actually save money,” says Paul Stappas, founder of Bookkeeping Management Administration.

Federal, state and local axes are withheld and paid when due, as are voluntary deductions including retirement plan contributions or insurance premiums. The service also includes federal and state quarterlies, year-end forms and W-2's.

“With one out of every three small businesses paying penalties to the IRS for late filings, our payroll service makes this obsolete,” says Stappas. “Our customers will never miss a tax deadline or pay the wrong amount.”

To get started, businesses only need to get the company and employee information and payroll history for the year. Companies can switch payroll providers at any time. Bookkeeping Management Administration will maintain complete records for quick access whenever it's needed. Employees can access their pay stubs securely online at www.paycheckrecords.com 24 hours a day, seven days a week.

Bookkeeping Management Administration is a turn-key bookkeeping service that handles monthly or semi-monthly accounts receivables, accounts payable and payroll needs for businesses of any size. The company is based in Neshanic Station, New Jersey. For more information visit www.bookkeepingadmin.com
